

es.deusto.client.gui.Login.
Login

es.deusto.client.gui.Movie
Details.MovieDetails

es.deusto.client.Client.switch
ToAdminHome

```
graph LR; A[es.deusto.client.gui.Login.Login] --> C[es.deusto.client.Client.switchToAdminHome]; B[es.deusto.client.gui.MovieDetails.MovieDetails] --> C;
```

The diagram illustrates a dependency or relationship between three classes. On the left, there are two source classes: 'es.deusto.client.gui.Login.Login' and 'es.deusto.client.gui.MovieDetails.MovieDetails'. Both of these classes have arrows pointing to a single target class on the right, 'es.deusto.client.Client.switchToAdminHome'. The target class is shaded gray, while the source classes are white with black borders.
