

es.deusto.server.data.User
DetailsDTO.UserDetailsDTO

es.deusto.server.data.User
DTO.UserDTO

es.deusto.server.jdo.User.getId

```
graph LR; A[es.deusto.server.data.UserDetailsDTO.UserDetailsDTO] --> C[es.deusto.server.jdo.User.getId]; B[es.deusto.server.data.UserDTO.UserDTO] --> C;
```

The diagram illustrates a dependency or mapping relationship. On the left, two white rectangular boxes represent data transfer objects (DTOs). The top box contains the text 'es.deusto.server.data.UserDetailsDTO.UserDetailsDTO' and the bottom box contains 'es.deusto.server.data.UserDTO.UserDTO'. On the right, a gray rectangular box represents a JDO class method, containing the text 'es.deusto.server.jdo.User.getId'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both DTOs are associated with or mapped to the 'getId' method of the 'User' JDO class.
