es.deusto.client.Client.switch
ToMovieSearch

```
graph LR; A[es.deusto.client.gui.BuyTickets.BuyTickets] --> C[es.deusto.client.Client.switchToMovieSearch]; B[es.deusto.client.gui.HomePage.HomePage] --> C;
```

The diagram illustrates a dependency or relationship between three classes. On the left, there are two source classes: 'es.deusto.client.gui.BuyTickets.BuyTickets' and 'es.deusto.client.gui.HomePage.HomePage'. Both of these source classes have arrows pointing to a single target class on the right: 'es.deusto.client.Client.switchToMovieSearch'. The target class is shaded gray, while the source classes are white with black borders.
